

CANADA STRATEGIC METALS
(an exploration company)

MANAGEMENT DISCUSSION AND ANALYSIS
For the nine-month period ended October 31, 2013
(Third quarter)

MANAGEMENT DISCUSSION AND ANALYSIS

This management discussion and analysis ("MD&A") of Canada Strategic Metals ("Canada Strategic" or the "Company") complies with Rule 51-102A of the Canadian Securities Administrators regarding continuous disclosure.

The MD&A is a narrative explanation, through the eyes of the management of Canada Strategic, of how the Company performed during the nine-month period ended October 31, 2013, and of the Company financial condition and future prospects. This discussion and analysis complements the unaudited condensed interim financial statements for the nine-month period ended October 31, 2013 but does not form part of them.

These unaudited condensed interim financial statements have been prepared by the Company's management in accordance with International Financial Reporting Standards ("IFRS"), and in accordance with IAS 34 "Interim Financial Reporting".

The condensed interim financial statements do not include all the information and notes required for the purpose of audited annual financial statements. The accountings methods used are the same that those used for the purpose of audited annual financial statements for the year ended January 31, 2013, prepared in accordance with the IFRS as they are published by the International Accounting Standards Board ("IASB"). Therefore, this discussion and analysis should be read in conjunction with the unaudited condensed interim financial statements as at October 31, 2013 and notes thereto, as well as the audited consolidated financial statements and notes thereto and the MD&A for the year ended January 31, 2013.

All figures are in Canadian dollars unless otherwise stated. Additional information relating to the Company can be found on SEDAR at www.sedar.com. The shares of Canada Strategic are listed on the TSX Venture Exchange under the symbol CJC, on the OTC Bulletin Board under the symbol CJCFF and on the Frankfurt Exchange under the symbol YXEN.

DATE

The MD&A was prepared on the basis of information available as at December 4, 2013.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements that reflect the Company's current expectations regarding future events. To the extent that any statements in this document contain information that is not historical, the statements are essentially forward-looking and are often identified by words such as "anticipate", "expect", "estimate", "intend", "project", "plan" and "believe". Forward-looking statements involve risks, uncertainties, and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. There are many factors that could cause such differences, particularly: volatility and sensitivity to market metal prices; impact of change in foreign currency exchange rates and interest rates; imprecision in reserve estimates; environmental risks including increased regulatory burdens; unexpected geological conditions; adverse mining conditions; changes in government regulations and policies, including laws and policies; failure to obtain the necessary permits and approvals from government authorities; and other development and operating risks.

While the Company believes that the assumptions underlying in the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this document. The Company disclaims any intention or obligation to update or revise any forward-looking statement, whether or not it should be revised because of new information, future events or otherwise, unless required to do so by the applicable securities laws.

MANAGEMENT DISCUSSION AND ANALYSIS

NATURE OF ACTIVITIES

Canada Strategic is incorporated under the Canada Business Corporations Act. The Company was involved in the acquisition, exploration and development of mining properties. The Company is active in Canada.

OVERALL PERFORMANCE

RESULTS OF OPERATIONS

GOELAND RARE EARTH – RARE EARTH PROJECT

Property Description

The Goeland rare earth property is located 215 km north of Val-d'Or in the Abitibi region of Quebec. The Goeland rare earth property consists of 2 large blocks and 2 single claims of 47 minerals claims totaling 2 610.79 hectares (26.11 km²) adjacent to the Montviel Carbonatite Complex. Historic exploration at Montviel has revealed strong potential for rare earth element ("REE"), niobium and phosphate mineralization.

The Montviel Carbonatite Complex encompasses six main geological units: Pmtv 1 through 6. To date, almost all of the anomalous REE, niobium and phosphate values have been encountered within Pmtv 5, which is composed of ferrocarnatite, apatite-bearing ferrocarnatite, silicocarnatite, and pyrrhotite-bearing calciocarnatite.

The Goeland Property is easily accessible via a network of logging roads. The principal exploration target for the property is carbonatite hosted REE mineralization.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

LAC DES ILES WEST – GRAPHITE PROJECT

Property Description

The Lac des Iles West property consists of 1 large contiguous block of 104 mineral claims totaling 5,601.30 hectares (56.01 km²) that borders the western limit of the Timcal Lac Des Îles graphite mine close to the town of Mont-Laurier, 150 km northwest of Montréal in southern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

CHAMPAGNE – GRAPHITE PROJECT

Property Description

The Champagne property group consists 1 large contiguous block of 88 mineral claims totaling 4,872.76 hectares (48.73 km²) located approximately 120 km north of Baie-Comeau, Quebec.

MANAGEMENT DISCUSSION AND ANALYSIS

Work done during the period

On April 16, 2013 the Company announce that it has received graphite grab and channel sample assay results derived from the Company's recent sampling program on the Champagne and Grand Prix properties. The sampling program has confirmed presence of graphite bearing structures in many areas of the properties. Best assays are show in the table below*.

Champagne grab samples:

Sample No	Graphite %								
115311	0.91	115312	0.64	115313	1.00	115314	0.77	115315	2.05

*Grab samples are selective by nature and are unlikely to represent the average grade of a deposit.

LA LOUTRE – GRAPHITE PROJECT

Property Description

The La Loutre Property consists of 1 large contiguous block of 42 mineral claims totaling 2,508.97 hectares (25.09 km²) located approximately 53 km east of Timcal's Lac des Iles graphite mine, 117 km northwest of Montréal in southern Québec.

Work done during the period

During the period ended July 31, 2013, the Company incurred expenses of \$14,422 on exploration and development expenditures relating to the metallurgical testing.

On June 6, 2013 the Company announce the results from preliminary metallurgical flotation testing based on a composite of several graphite samples from the La Loutre Property. The Company has submitted on composite, representing three (3) different geological units present on the property to Global Mineral Research Ltd (GMR Ltd) for this evaluation. This composite samples has been prepared with the grab samples obtained during the summer exploration program on the property (see news release dated July 24, 2012) which confirmed the presence of a large graphite bearing structure covering an area of approximately 7 kilometers by 1 kilometer with results of up to 22.04% Graphite in multiple parallel zones of 30-50 meters wide. Another area has also been identified covering approximately 2 kilometers by 1 kilometer in multiple parallel zones of 20-50 meters wide, which includes results of up to 18% Graphite.

The primary objective of the test program was to determine the recoverability of the graphite mineral by flotation and gravity concentration. The grind sensitivity tests, conducted in the range of 576 to 237 microns, indicate the recoveries are not significantly affected by the varying primary grinds. However, a finer feed is observed to yield better graphite recoveries. The best rougher flotation results achieved 80.4% graphite recovery in 10.9% mass yield with a grade of 34.5% graphite.

Cleaning of the rougher concentrate was best achieved by incorporation gravity with the flotation process. The cleaner flotation with gravity test results indicate that both rougher and cleaner concentrates contain liberated graphite flakes which can be upgrade by gravity. The final gravity concentrate shows 65.3% recovery with a grade of 80% in 3.8% mass yield. Further size reduction of various products from this procedure will potentially improve on the final grade and recovery of the graphite. Due to limitations of available feed material, optimization testing has yet to be conducted. Additional test are recommended to improve on overall graphite grade and recovery to the final product.

In September 2013, the Company has received all the permits it needs to start drilling a 1,500 meter drill program on the La Loutre project. This 1 The objective of this 15–20 hole drill program will be to

MANAGEMENT DISCUSSION AND ANALYSIS

verify the areas of high-grade graphite results towards establishing a flake graphite resource at the La Loutre property by December 2013 and use a better representative samples to conduct optimization flotation testing. Management is now assessing the various ways it might finance the program.

On September 23, 2013, the Company announced that it has received more high grade graphite grab sample assay results derived from recent detailed sampling program on the La Loutre property and from reconnaissance sampling from the Lac des Iles property. The La Loutre property consists of contiguous claim blocks totaling approximately $\pm 2,500$ hectares (25 km^2) situated approximately 53 km to the east of Timcal's Lac des Iles Graphite Mine, 117 km northwest of Montreal. To date, the sampling program has confirmed a graphite bearing structure covering an area approximately 7 kilometers by 1 kilometer with results of up to 22.04% Graphite in multiple parallel zones of 30 to 50 meters wide. Another area has also been identified covering approximately 2 kilometers by 1 kilometer in multiple parallel zones of 20-50 meters wide which includes results up to 18% Graphite. All new assays are show in the table below*.

La Loutre best grab samples:

Sample No	Graphite %								
115732	17.25	115719	3.00	115708	2.15	115701	1.82	115731	0.65
115728	9.16	115712	2.60	115726	2.13	115710	1.80	115720	0.49
115718	7.76	115716	2.49	115709	2.08	115725	1.78	115721	0.44
115707	6.72	115711	2.44	115703	2.04	115723	1.66	115722	0.44
115717	5.26	115713	2.42	115715	2.04	115706	1.65		
115729	4.12	115727	2.27	115705	1.96	115702	1.54		
115730	3.86	115704	2.26	115724	1.91	115714	1.29		

Lac des Iles best grab samples:

Sample No	Graphite %	Sample No	Graphite %
115736	1.2	115737	1.2

*Grab samples are selective by nature and are unlikely to represent the average grade of a deposit.

All the samples were sent for analysis in sealed containers to the Chemex laboratory in Val-d'Or by employees of the Company. The samples are weighed and identified prior to sample preparation. The samples are crushed to 70% minus 2 mm, then separated and pulverized to 85% passing 75 μm . All

MANAGEMENT DISCUSSION AND ANALYSIS

samples are analyzed using C-IR18, for Carbon Graphite. Management is encouraged that these new samples results that confirm again the presence of graphite, on surface, and over a large area, all of which offers great potential to develop a graphite resource on the La Loutre property.

GRAND PRIX NORTH – GRAPHITE PROJECT

Property Description

The Grand Prix North Property consists of 1 large contiguous block of 15 mineral claims totaling 829.99 hectares (8.29 km²) located approximately 130 km northwest of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

PARADISE 1 – GRAPHITE PROJECT

Property Description

The Paradise 1 property consists of 1 large contiguous block of 17 mineral claims totaling 923.81 hectares (9.24 km²) located approximately 190 km north of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MARBLE SOUTH – GRAPHITE PROJECT

Property Description

The Marble South property consists of 1 large contiguous block of 25 mineral claims totaling 1,392.02 hectares (13.92 km²) located approximately 100 km northwest of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MARDI GRAS – GRAPHITE PROJECT

Property Description

The Mardi Gras property consists of 2 large blocks of 21 mineral claims totaling 1,122.83 hectares (11.23 km²) located approximately 160 km northwest of Sept-Iles in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MANAGEMENT DISCUSSION AND ANALYSIS

GRAND PRIX – GRAPHITE PROJECT

Property Description

The Grand Prix property consists of 1 large contiguous block of 275 mineral claims totaling 14,977 hectares (149.77 km²) located approximately 110 km northwest of Baie-Comeau in central eastern Québec.

Work done during the period

On April 16, 2013, the Company announced that it has received graphite grab and channel sample assay results derived from the Company's recent sampling program on the Champagne and Grand Prix properties. The sampling program has confirmed presence of graphite bearing structures in many areas of the properties with results of up to 7.21% Graphite in grab samples and 6.16% graphite on two (2) meters in channel samples. Best assays are show in the table below*.

Grand Prix grab samples:

Sample No	Graphite %								
115301	7.21	115306	1.80	115334	1.41	115339	3.03	115344	2.98
115302	4.10	115307	0.43	115335	1.91	115340	3.02	115345	2.82
115303	6.90	115308	0.98	115336	5.84	115341	5.47	115346	3.33
115304	3.49	115309	1.24	115337	1.06	115342	1.48	115347	3.11
115305	3.59	115310	0.66	115338	1.02	115343	0.63		

Grand Prix channel samples:

Channel name	Easting (UTM)	Northing (UTM)	Bearing (°)	Mineralisation		Length along the channel (m.)	Average grade graphite %
				From (m)	To (m)		
GPR1	463321	5526830	70	0.00	2.00	2.00	6.16
GPR2	463332	5526809	290	0.00	4.00	4.00	3.51
GPR3	463336	5526804	290	0.00	1.00	1.00	3.70
GPR4	463341	5526628	170	0.00	6.00	6.00	3.07
GPR5	463327	5526632	240	0.00	5.00	5.00	3.26

*Channels do not necessarily represent the true width of the mineralized zone.

PARADISE 2 – GRAPHITE PROJECT

Property Description

The Paradise 2 property consists of 1 large contiguous block of 112 mineral claims totaling 6,102.53 hectares (61.03 km²) located approximately 170 km north of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MANAGEMENT DISCUSSION AND ANALYSIS

WHITE – GRAPHITE PROJECT

Property Description

The White property consists of 1 large contiguous block of 10 mineral claims totaling 557.32 hectares (5.57 km²) located approximately 50 km north of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

BUTTERFLY – GRAPHITE PROJECT

Property Description

The Butterfly property consists of 3 blocks of 261 mineral claims totaling 14,084.03 hectares (140.84 km²) located approximately 102 km northwest of Sept-Îles in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MARBLE NORTH – GRAPHITE PROJECT

Property Description

The Marble North property consists of 1 large contiguous block of 13 mineral claims totaling 722.84 hectares (7.23 km²) located approximately 100 km northwest of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

LION – GRAPHITE PROJECT

Property Description

The Lion property consists of 1 large contiguous block of 120 mineral claims totaling 6,553.13 hectares (65.53 km²) located approximately 110 km north of Matagami in western Québec.

Work done during the period

During the period, the Company decided to not renew the claims of the Lion's property to focus its energies and capital on its most promising properties.

TÉTÉPISCA – GRAPHITE PROJECT

Property Description

The Tétépisca property consists of 1 large contiguous block of 78 mineral claims totaling 4,206.09 hectares (42.06 km²) located approximately 230 km northwest of Baie-Comeau in central eastern Québec.

Work done during the period

No exploration work was carried out on the property during the period covered by this MD&A.

MANAGEMENT DISCUSSION AND ANALYSIS

SAKAMI – GOLD PROJECT

Property Description

The Sakami property consists of 1 large contiguous block of 120 mineral claims totaling 6,032.18 hectares (60.32 km²) located approximately 570 km north of Val-d'Or and 900 km north northwest of Montreal.

Work done during the period

On September 9, 2013, the Company announced the mobilization of a crew on site to complete detailed geological mapping on the JR area, a geochemical soil sampling on the JR and Island area, complete a mag survey on certain areas of the JR area and achieve a full sampling program including channel samples on the JR and Iles area. The Company also plans to start the permitting process and camp installation for a drilling campaign later in the fall and during the winter on the Point and JR areas.

On October 24, 2013, the Company announced that early results from a recent sampling program on Zones 25, 26, 43 and 9.6 on the Sakami property show high-grade gold assays of up to 61.37 g/t for grab samples.

The Company is currently conducting a geochemical survey on the "JR" and "Iles" areas, where over 1,200 soil samples will be collected. Mapping and detailed sampling, including channel sampling principally on Zone 43, is also underway. Zone 43 is exposed at surface by old stripping over 150 metres long by 50-75 metres wide, and consists of a mafic volcanic, Algoma-type sulphide iron formation coinciding with a strong IP anomaly. The Company is awaiting a permit before starting a 1,500-metre drilling program on the Pointe Area to extend Zones 25 and 26, and also to test various IP conductors. All new assays are shown in the table below.*

Sakami best grab samples:

Sample No	Au ppm 0.01 Py-SAA Au	Zone	Sample No	Au ppm 0.01 Py-SAA Au	Zone	Sample No	Au ppm 0.01 Py-SAA Au	Zone
115751	1.19	Zone 26	115755	2.25	Zone 25	115769	3.9	Zone 9.6
115752	5.18	Zone 26	115756	4.75	Zone 25			
115753	1.39	Zone 26	115758	1.33	Zone 25			

MANAGEMENT DISCUSSION AND ANALYSIS

Sample No	Au ppm 0.01 Py-SAA Au	Au g/Mt 0.10 PYRO-GRAV	Zone
115759	> 10.0	61.37	Zone 43
115761	2.6		Zone 43
115764	4.28		Zone 43

*Grab samples are selective by nature and unlikely to represent the average grade of a deposit.

A map of the Sakami property with the new results can be found on the Company's website.

All the samples were sent for analysis in sealed containers to Laboratoire d'analyse Bourlamaque ltée. laboratory in Val-d'Or by employees of the Company. The samples are weighed and identified prior to sample preparation. All samples are analyzed by fire assay with AA finish on a 30g sample (0.01-10 ppm Au), with a gravimetric finish for assays over 10 ppm Au.

To date most exploration work has focused on Zone 25, where stratiform gold mineralization has been found hosted by a sequence of strongly silicified quartzites, arkoses and felsic dykes within paragneiss of the Opinaca sub-province. This mineralized horizon occurs as an antiform-synform pair that plunges moderately to the southwest. Matamec Explorations Inc. (TSX.V MAT) drilling intersected it within a surface area of approximately 150 metres by 160 metres, and to a depth of 220 metres. The thickest mineralization is developed within the hinge zone of the two interpreted folds with drill intercepts including: 2.62 grams per tonne (g/t) Au over 54.70 metres core length from EX-10, and 4.16 g/t Au over 21.00 metres core length in EX-22. A broad "envelope" of lower grade mineralization of approximately 1 g/t Au characterizes the zone and encloses higher grade sections typically ranging from 1-3 g/t Au.

Hole #	Au (g/t)	Length (metres)	From (metres)	To (metres)
EX-1	2.38	7.90	91.90	99.80

Zone 25 selected intersections

MANAGEMENT DISCUSSION AND ANALYSIS

Nearby, at Zone 26, gold mineralization is hosted by a sulphide banded iron formation present in mafic volcanics of the La Grande sub-province. This zone occurs within the interpreted hinge of a southwest moderately plunging syncline and has been traced by drilling for 140 metres along the fold axis and to a depth of 185 metres below surface. Seven drill holes tested the zone and intersected inconsistent gold mineralization, with the best interval assaying 9.22 g/t Au over 12.55 metres, including 13.67 g/t Au over 7.35 metres. This high grade intersection occurs proximal to high grade sections intersected in Zone 25 (EX-31).

Hole #	Au (g/t)	Length (metres)	From (metres)	To (metres)
EX-19 including	9.22 13.67	12.55 7.35	53.80 58.25	66.35 65.60
EX-20	4.07	1.35	66.75	68.10

EX-32	2.53 3.41	1.50 1.50	64.29 69.82	65.79 71.32
EX-48	1.00	9.00	49.00	58.00
EX-49	2.69	3.00	64.00	67.00

Zone 26 selected intersections

Both Zone 25 and Zone 26 occur within 50 metres of the contact between the two sub-provinces.

Person In Charge of Technical Disclosure

Jean-Sebastien Lavallee (OGQ #773), geologist, shareholder, President and Chief Executive Officer of the Company and a Qualified Person under *NI 43-101 on standards of disclosure for mineral projects*, has written and approved the technical content of this MD&A for the properties.

RESULTS OF OPERATIONS

Canada Strategic anticipates that, for the foreseeable future, quarterly results of operations will primarily be impacted by several factors, including the timing of exploration and the efforts and timing of expenditures related to the development of the Company. Due to fluctuations in these factors, the Company believes that the period-to-period comparisons of operating results are not a good indication of its future performance.

The following discussion and analysis are based on Canada Strategic's results of operations for the nine-month period ended October 31, 2013. The selected financial information below was taken from the unaudited condensed interim financial statements for each period shown.

MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL HIGHLIGHTS

	October 31 (9 months)	
	2013	2012
Revenues	\$ 6,119	\$ 2,537
General administrative expenses	\$ 47,390	\$ 109,615

Cash & cash equivalents	\$ 862,707	\$ 40,056

Revenues

Revenues for the nine-month period ended October 31, 2013, amounted to \$6,119 (\$2,537 in 2012) and consisted of interest revenues. Given its status as a mining exploration company, Canada Strategic does not generate any steady income, and must issue equity to continue its activities.

General Administrative Expenses

General administrative expenses for the nine-month period ended October 31, 2013, consisted mainly of general office expenditures, travel expenses, promotional activities and the Company's claim renewal expenses. The decrease was mainly due to travel, insurance expenses and general office expenditures.

Registration, Listing Fees and Shareholder Information

Registration, listing fees and shareholder information expenses for the nine-month period ended October 31, 2013, consisted mainly of expenditures of a legal and regulatory nature incurred to comply with the requirements of the securities commission. The change resulted from a decrease in filing fees, listing fees and transfer agent expenses and an increase in investor relation and shareholder communication expenses.

Professional and Consultant Fees

Professional and consulting fees for the nine-month ended October 31, 2013, consisted primarily of expenses of a legal and accounting nature, as well as audit, business development and management expenses. The decrease of \$68,959 relative to the prior period resulted from changes in legal fees, consulting fees, business development expenses and accounting-related expenses.

Stock-Based Compensation

Share-based payments and compensation for the nine-month period ended October 31, 2013, represent the charge related to the value of the 1,300,000 stock options granted to directors, officers and consultants, compared to 1,525,000 options as at October 31, 2012. A compensation charge of \$81,184 (\$62,563 in 2012) was thus assigned in relation to the stock options granted during the period, using the Black-Scholes model.

MANAGEMENT DISCUSSION AND ANALYSIS

SUMMARY OF QUARTERLY RESULTS

The comments below provide an analysis of the operating results for the three-month period ended October 31, 2013. The selected financial information shown below is taken from the condensed unaudited interim consolidated financial statements for each of the three-month periods indicated.

FINANCIAL HIGHLIGHTS

	October 31 (3 months)	
	2013	2012
Revenues	\$ -	\$ -
General administrative expenses	\$ 13,294	\$ 15,821
Registration, listing fees and shareholders'	\$ 64,779	\$ 29,851
Professional and consultant fees	\$ 24,023	\$ 108,296
Stock-based compensation	\$ 81,184	\$ -
Part XII.6 taxes	\$ 972	\$ -
Write-off of exploration and evaluation assets	\$ 39,599	\$ -
Loss before income taxes	\$ 223,851	\$ 153,968
Deferred income and mining taxes	\$ (69,539)	\$ -
Total comprehensive loss for the period	\$ 154,312	\$ 153,968
Cash & cash equivalents	\$ 862,707	\$ 40,056

General Administrative Expenses

General administrative expenses for the three-month period ended October 31, 2013, consisted mainly of general office expenditures, travel expenses, promotional activities and the Company's claim renewal expenses. The decrease was mainly due to travel and general office expenditures.

Registration, Listing Fees and Shareholder Information

Registration, listing fees and shareholder information expenses for the three-month period ended October 31, 2013, consisted mainly of expenditures of a legal and regulatory nature incurred to comply with the requirements of the securities commission. The change from the prior period was mainly due to an increase in expenses related to shareholder communications.

Professional and Consultant Fees

Professional and consulting fees for the three-month ended October 31, 2013, consisted primarily of expenses of a legal and accounting nature, as well as audit, business development and management expenses. These fees were \$84,273 lower than the prior period due to decrease in business development, legal and consulting fees.

Stock-Based Compensation

Share-based payments and compensation for the three-month period ended October 31, 2013, represent the charge related to the value of the 1,300,000 stock options granted to directors, officers and consultants. A compensation charge of \$81,184 (Nil in 2012) was thus assigned in relation to the stock options granted during the period, using the Black-Scholes model.

The selected financial information below was taken from Canada Strategic's unaudited condensed financial statements for each of the following quarters:

MANAGEMENT DISCUSSION AND ANALYSIS

LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents as at October 31, 2013, totalled \$862,707 compared to \$40,056 as at October 31, 2012. It is management's intention to secure further capital funding in the form of equity to support current and future exploration and evaluation assets development.

The selected financial information below was taken from Canada Strategic's unaudited condensed financial statements for each of the following quarters:

Date	Financing		Commercial Goals	
December 2012	Flow-through	\$470,000	Exploration expenditures	Still has \$272,464 to spend at the latest December 31, 2013

For the next year, the Company has budgeted \$400,000 for administrative expenses. Management is of the opinion that, even if it is unable to raise additional equity financing, the Company will be able to meet its current exploration obligations and keep its properties in good standing for the next 12 months. Advanced exploration of some of the mineral properties would require substantially more financial resources. There is no assurance that such financing will be available when required, or under terms that are favourable to Canada Strategic. The Company may also select to advance the exploration and development of exploration and evaluation assets through joint ventures. Management is currently considering opportunities for further financing.

CASH FLOWS

	October 31 (9 months)	
	2013	2012
Operating activities	\$ (523,353)	\$ (227,990)
Financing activities	\$ (22,666)	\$ 667,625
Investing activities	\$ 383,571	\$ (597,163)
	<u>\$ (162,448)</u>	<u>\$ (157,528)</u>
 Cash & cash equivalents	 \$ 862,707	 \$ 40,056

During the nine-month period ended October 31, 2013, funds used for operating activities were spent primarily on improving operations and promotion of the Company.

During the nine-month period ended October 31, 2013, the Company issued 7,000,000 common shares. The total fair value of the common shares issued was \$700,000.

During the nine-month period ended October 31, 2013, investing activities consisted of the receipt of an income tax credit, changes in certain mineral property acquisition commitments where payments initially to be made in cash were made in shares, and the acquisition of the Sakami property.

MANAGEMENT DISCUSSION AND ANALYSIS

CONTRACTUAL OBLIGATIONS AND OFF-BALANCE-SHEET ARRANGEMENTS

Commitments with Key Executives

A) In July 2012 and amended two time (August 2012 and June 2013), the Company entered into an option agreement on the Grand Prix, Grand Prix North, Butterfly, Paradise 1, Paradise 2, Marble North, Marble South, Tetepisca, Mardi Gras, White and Lion (collectively named "North Shore") properties in the province of Quebec. The agreement provides that Company may acquire a 100% interest in the properties by the issuance of 7,500,000 common shares, as follows:

- 1,500,000 shares at the TSX Venture Exchange conditional approval (condition fulfilled);
- 1,500,000 shares at the TSX Venture Exchange final approval (condition fulfilled);
- 1,500,000 shares three month following the TSX Venture Exchange final approval (condition fulfilled);
- 1,500,000 shares fifteen month following the TSX Venture Exchange final approval;
- 1,500,000 shares twenty-four month following the TSX Venture Exchange final approval.

In addition, the Company has undertaken to incur \$250,000 (\$51,917 has already been incurred as at July 31, 2013) over an eighteen month period. Expenditures under the North Shore and Champagne Agreement will be counted for the purpose of satisfying this requirement.

In relation with the agreement, the Company will also have to pay \$150,000 in cash and to issue 3,000,000 common shares on production of a resource estimate with 200,000 tonnes or more of graphite (at cut-off of 5%). This obligation will terminate if a similar bonus payment is made under the Champagne Option Agreement.

Under the terms of the agreement, the properties remain subject to a 2% NSR royalty payable to the vendors. The Company has the option to purchase 1.0% of this NSR royalty for \$1,000,000.

B) In April 2012 and amended three time (July 2012, August 2012 and June 2013), the Company entered into an option agreement on the Champagne property in the province of Quebec. The agreement provides that Company may acquire a 100% interest in the property in consideration of a total of \$330,000 in cash payments, as follows:

- \$60,000 at the signature date (condition fulfilled);
- \$135,000 fifteen months after final approval (received in March 2013) by the TSX Venture Exchange;
- \$135,000 twenty-four months after final approval by the TSX Venture Exchange.

The Company has also agreed to issue 7,200,000 common shares as follows:

- 1,500,000 shares at the TSX Venture Exchange conditional approval (condition fulfilled);
- 1,500,000 shares at the TSX Venture Exchange final approval (condition fulfilled);
- 1,200,000 shares three month following the TSX Venture Exchange approval (condition fulfilled);
- 1,500,000 shares fifteen month following the TSX Venture Exchange final approval;
- 1,500,000 shares twenty-four month following the TSX Venture Exchange final approval.

In addition, the Company has undertaken to incur \$250,000 (\$51,917 has already been incurred as at April 30, 2013) over an eighteen month period. Expenditures under the Champagne and North Shore Agreement will be counted for the purpose of satisfying this requirement.

MANAGEMENT DISCUSSION AND ANALYSIS

In relation with the agreement, the Company will also have to pay \$150,000 in cash and to issue 3,000,000 common shares on production of a resource estimate with 200,000 tonnes or more of graphite (at cut-off of 5%). This obligation will terminate if a similar bonus payment is made under the North Shore Option Agreement.

Under the terms of the agreement, the property remains subject to a 2% NSR royalty payable to the vendors. The Company has the option to purchase 1.0% of this NSR royalty for \$1,000,000.

C) In February 2012, the Company entered into an option agreement on the La Loutre property in the province of Quebec. The agreement provides that Company may acquire a 100% interest in the property as follows:

- \$15,000 at the signature of the Agreement (condition fulfilled);
- \$15,000 at the TSX Venture Exchange final approval (received in March 2012) (condition fulfilled);
- \$15,000 eighteen months after final approval by the TSX Venture Exchange. May be paid in common shares of the Company (condition fulfilled – issuance of 300,000 common shares).

The Company has also agreed to issue 2,600,000 common shares as follows:

- 1,000,000 shares at the signature of the Agreement (condition fulfilled);
- 1,100,000 shares twelve months following the TSX Venture Exchange final approval (condition fulfilled);
- 500,000 shares eighteen months following the TSX Venture Exchange final approval (condition fulfilled).

In addition, the Company has undertaken to incur \$100,000 (\$132,838 has already been incurred as at October 31, 2013) over a twelve month period.

Under the terms of the agreement, the property remains subject to a 1.5% NSR royalty payable to the vendors. The Company has the option to purchase 0.5% of this NSR royalty for \$500,000.

Other Commitments

D) In September 2012, the Company retained the services of Paradox Public Relations (“Paradox”) to handle public relations. Paradox focuses on developing and expanding the Company’s communications with the financial community through a full investor relations program. The services provided include marketing to the financial community, an inbound email service, the use of an exclusive Paradox database, organization of meetings and presentations and service calls on behalf of the Company. The agreement covers a 24-month period at a monthly fee of \$7,000.

E) In February 2012, the Company entered into an option agreement on the Lac des Isles West property in the province of Quebec. The agreement provides that Company may acquire a 100% interest in the property in consideration of a total of \$12,500 in cash payments, as follows:

- \$12,500 at the signature of the Agreement (condition fulfilled).

The Company has also agreed to issue 500,000 common shares as follows:

- 300,000 shares at the TSX Venture Exchange final approval (condition fulfilled);
- 200,000 shares six months following the TSX Venture Exchange final approval (condition fulfilled).

MANAGEMENT DISCUSSION AND ANALYSIS

In addition to the above cash payments and common share issuances, the Company must issue a bonus in the form of common shares with a fair value of \$1,000,000 or pay \$1,000,000 upon commencement of production.

F) In January 2011, the Company entered into an option agreement on the Goeland property in the province of Quebec. The agreement provides that Company may acquire a 100% interest in the property in consideration of a total of \$25,000 in cash payments, as follows:

- \$25,000 at the signature of the Agreement (condition fulfilled).

The Company has also agreed to issue 2,500,000 common shares as follows:

- 1,000,000 shares at the TSX Venture Exchange final approval (condition fulfilled);
- 500,000 shares twelve months following the TSX Venture Exchange final approval (condition fulfilled);
- 500,000 shares twenty-four months following the TSX Venture Exchange final approval (condition fulfilled);
- 500,000 shares thirty-six months following the TSX Venture Exchange final approval.

Under the terms of the agreement, the property remains subject to a 2% NSR royalty payable to the vendors.

G) In August 2013, the Company entered into an option agreement on the Sakami property in the province of Quebec. The Agreement provides for the Company to acquire an interest of up to 70%. This acquisition will begin with the acquisition of a 50% interest in the property in consideration of the issuance of 2,000,000 common shares, as follows:

- 500,000 shares on signature of the Agreement (condition fulfilled).
- 500,000 shares twelve months after final TSX Venture Exchange approval (received in August, 2013);
- 500,000 shares twenty-four months after final TSX Venture Exchange approval;
- 500,000 shares thirty-six months after final TSX Venture Exchange approval.

A minimum of \$500,000 must be spent on exploration before the first anniversary of the agreement. In the event that the Company renounces its option, the unspent portion of the \$500,000 minimum in exploration expenses shall be paid in cash or in shares, at the sole discretion of the Company.

In addition, the Company has undertaken to incur \$2,500,000 in exploration and evaluation expenses before August 16, 2016 (\$174,534 had already been incurred as at October 31, 2013), as follows:

- \$500,000 twelve months after final TSX Venture Exchange approval;
- \$750,000 twenty-four months after final TSX Venture Exchange final approval;
- \$1,000,000 thirty-six months after final TSX Venture Exchange approval.

Once the Company has earned a 50% interest, the parties will form a full joint venture.

For 180 days after acquiring its 50% interest in the property, Canada Strategic Metals will have the option of acquiring an additional 20% property interest by issuing 1 million shares to Matamec and completing an independent bankable feasibility study within five years of the date of the share issuance. During the period that the additional option is valid, Canada Strategic Metals must spend a minimum of \$2,000,000 on exploration by the end of each year until the feasibility study is completed.

MANAGEMENT DISCUSSION AND ANALYSIS

Under the terms of the agreement, the property remains subject to a 1 % NSR royalty on certain claims.

H) On December 4, 2013, the Company signed a formal agreement with Strateco Resources Inc. on the Apple property in the James Bay region of northern Quebec. The agreement, which is effective immediately, provides for Canada Strategic Metals to acquire 100% of the Apple property, wholly-owned by Strateco, in consideration of \$10,000 and 4,000,000 shares of the Company. The common shares issued to Strateco, will be subject to resale restriction periods as follows:

- 800,000 common shares within four months of TSX-V approval of the Agreement;
- 800,000 common shares within nine months of TSX-V approval of the Agreement;
- 800,000 common shares within 12 months of TSX-V approval of the Agreement;
- 800,000 common shares within 18 months of TSX-V approval of the Agreement; and
- 800,000 common shares within 24 months of TSX-V approval of the Agreement.

The agreement also provides for a 2% NSR royalty payable to Virginia Mines Inc., half of which can be bought back for \$1.0 million.

ROYALTIES ON THE MINING PROPERTIES

PROPERTY	ROYALTY		DESCRIPTION
	Name	Percentage	
Goeland	Zimtu Capital Corporation	50%	2% NSR
	Glenn Briesbaciai	50%	
La Loutre	Jean-Sébastien Lavallée	33,33%	1.5% NSR of which 0.5% may be purchased for an amount of \$500,000
	Jean-Raymond Lavallée	33,33%	
	Michel Robert	33,33%	
Champagne, Grand Prix North, Paradise 1, Marble South, Mardi Gras, Grand Prix, Paradise 2, White, Butterfly, Marble North and Tétépisca	Jean-Sébastien Lavallée	33,33%	2% NSR of which 1% may be purchased for an amount of \$1,000,000
	Jean-Raymond Lavallée	33,33%

Sakami	Luc Lamarche	50%	1 % NSR on 69 claims
	Jean-Raymond Lavallée	50%	
Apple	Virginia Mines Ltd	100%	2% NSR of which 1% may be purchased for an amount of \$1,000,000

MANAGEMENT DISCUSSION AND ANALYSIS

RELATED-PARTY TRANSACTIONS

Transactions with key Executives

A) During the comparative 2012 period, the Company has incurred professional and consultants fees amounting to \$10,500 with a company controlled by its former chief financial officer. In relation with these transactions, no amount was payable as at October 31, 2013.

B) During the period, the Company has incurred professional and consultants fees amounting to \$6,849 (Nil in 2012) with its chief financial officer. In relation with these transactions, no amount was payable as at October 31, 2013.

C) During the period, the Company incurred \$222,534 in exploration and evaluation assets (Nil in 2012), general administrative expenses for \$27,614 (Nil in 2012) with Consul-Teck Exploration Minière Inc., a company controlled by the President and Chief Executive Officer of the Company. In relation with these transactions, \$79,749 was payable to Consul-Teck Exploration Minière Inc. as at October 31, 2013.

The transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed by the related parties.

D) In July 2012, the Company signed an option agreement to acquire a 100% interest in the North Shore Package properties from several individuals, including Jean-Sébastien Lavallée. Under this agreement, the Company issued to Mr. Lavallée 1,500,000 common shares.

The President of the Company also owns 33.33% royalty of the 2% NSR royalty on the said property. Half of the royalty can be redeemed by the Company for the sum of \$1,000,000.

E) In April 2012, the Company signed an option agreement to acquire a 100% interest in the Champagne property from several individuals, including Jean-Sébastien Lavallée. Under this agreement, the Company paid to Mr. Lavallée \$20,000 in cash and issued 1,400,000 common shares.

The President of the Company also owns 33.33% royalty of the 2% NSR royalty on the said property. Half of the royalty can be redeemed by the Company for the sum of \$1,000,000.

F) In February 2012, the Company signed an option agreement to acquire a 100% interest in the La Loutre property from several individuals, including Jean-Sébastien Lavallée. Under this agreement, the Company paid to Mr. Lavallée \$10,000 in cash and issued 966,666 common shares.

The President of the Company also owns 33.33% royalty of the 1.5% NSR royalty on the said property. The Company has the option to purchase 0.5% of this NSR royalty for \$500,000.

These transactions are measured at amount of consideration established and agreed by the related parties.

Transactions with Board of Directors

G) During the comparative 2012 period, the Company has incurred professional and consultants fees amounting to \$30,000 with companies controlled by Directors of the Company. In relation with these transactions, no amount was payable as at October 31, 2013.

H) During the comparative 2012 period, the Company charged \$8,757 for lease of office with a company controlled by a former director of the Company. In relation with these transactions, an amount of \$11,347 was receivable as at October 31, 2013.

MANAGEMENT DISCUSSION AND ANALYSIS

The transactions are in the normal course of operations and are measured at amount of consideration established and agreed by the related parties.

SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

These unaudited condensed interim financial statements have been prepared by the Company's management in accordance with International Financial Reporting Standards ("IFRS"), and in accordance with IAS 34 "Interim Financial Reporting".

The condensed interim financial statements do not include all the information and notes required for the purpose of audited annual financial statements. The accountings methods used are the same that those used for the purpose of audited annual financial statements for the year ended January 31, 2013, prepared in accordance with the IFRS as they are published by the International Accounting Standards Board ("IASB"). Therefore, this discussion and analysis should be read in conjunction with the unaudited condensed interim financial statements as at October 31, 2013 and notes thereto, as well as the audited financial statements and notes thereto and the MD&A for the year ended January 31, 2013.

Exploration and evaluation assets

All direct costs related to the acquisition and exploration of exploration and evaluation assets are capitalized until the properties to which they relate are ready for their intended use, sold, abandoned or management has determined there to be impairment. If economically recoverable or reserves are developed, capitalized costs of the related property are reclassified as exploration and evaluation assets being depleted and amortized using the units-of-production method following commencement of production. Interest on borrowings incurred to finance mining assets is capitalized until the asset is capable of carrying out its intended use.

The Company recognizes mining exploration tax recoveries in the year in which the related qualifying resource expenditures are incurred, unless collection is not reasonably assured, and reduces the carrying values of exploration and evaluation assets by the respective recovery amount.

Property and equipment

Property and equipment are recorded at cost. Amortization is calculated on the straight-line basis over the useful lives of the assets as follows:

Furniture and equipment	5 years
Leasehold improvements	5 years
Software license	2 years

Additions during the year are amortized at one-half the annual rates.

(i) Subsequent costs

The cost of replacing part of an item within property and equipment is recognized when the cost is incurred if it is probable that the future economic benefits will flow to the group and the cost of the item can be measured reliably. The carrying amount of the part that has been replaced is expensed. All other costs are recognized as an expense as incurred.

(ii) Impairment

The Company's tangible and intangible assets are reviewed for indications of impairment at each

MANAGEMENT DISCUSSION AND ANALYSIS

statement of financial position date. If indication of impairment exists, the asset's recoverable amount is estimated. An impairment loss is recognized when the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in the statement of operations for the year.

The recoverable amount is the greater of the asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

(iii) Reversal of impairment

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or depletion, if no impairment loss had been recognized. An impairment loss with respect to goodwill is never reversed.

(iv) Decommissioning

Future obligations to retire an asset, including dismantling, remediation, and ongoing treatment and monitoring of the site related to normal operations are initially recognized and recorded as a liability based on estimated future cash flows discounted at a credit-adjusted risk-free rate. The decommissioning and restoration provision ("DRP") is adjusted at each reporting year for changes to factors including the expected amount of cash flows required to discharge the liability, the timing of such cash flows and the credit-adjusted risk-free discount rate.

The liability is accreted to full value over time through periodic charges to income. This unwinding of the discount is charged to finance costs in the statements of operations.

The amount of the DRP initially recognized is capitalized as part of the related asset's carrying value and amortized to income. The method of amortization follows that of the underlying asset. The costs related to a DRP are only capitalized to the extent that the amount meets the definition of an asset and can bring about future economic benefit. For a closed site or where the asset, which generated a DRP, no longer exists, there is no longer future benefit related to the costs and, as such, the amounts are expensed. For operating sites, a revision in estimates or a new disturbance will result in an adjustment to the liability with an offsetting adjustment to the capitalized retirement cost. For closed sites, adjustments to the DRP that are required as a result of changes in estimates are charged to income in the year in which the adjustment is identified.

Share-based payments

The Company has a stock option plan. Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods using the Black-Scholes Options Pricing Model. Share-based payments to non-employees are measured at the fair value of the goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured, and are recorded at the date the goods or services are received. The offset to the recorded cost is to share-based payments reserve.

Consideration received on the exercise of stock options is recorded as share capital and the related share-based payments reserve is transferred to share capital. Where awards are forfeited because non-market based vesting conditions are not satisfied, the expense previously recognized is proportionately reversed in the year the forfeiture occurs.

MANAGEMENT DISCUSSION AND ANALYSIS

Unit offerings

The Company uses the residual value method with respect to the measurement of common shares and share purchase warrants issued as private placement units. The proceeds from the issue of units is allocated between common shares and share purchase warrants on a residual value basis, wherein the fair value of the common shares is based on the market value on the date of announcement of the private placement and the balance, if any, is allocated to the attached warrants.

Loss per share

Basic loss per share is computed by dividing the net loss available to common shareholders by the weighted average number of shares outstanding during the reporting year. Diluted loss per share is computed using the treasury stock method. In accordance with the treasury stock method, the weighted average number of common shares outstanding is increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting years.

Financial instruments

(i) Financial assets

The Company classifies its financial assets in the following categories: fair value through profit or loss ("FVTPL"), held-to-maturity ("HTM"), available-for-sale ("AFS"), and loans and receivables. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of financial assets at recognition.

Fair value through profit or loss

Financial assets at FVTPL are initially recognized at fair value with changes in fair value recorded through income. Cash is included in this category of financial assets.

Held-to-maturity financial assets

HTM investments are recognized on a trade-date basis and are initially measured at fair value, including transaction costs. The Company does not have any assets classified as HTM.

Available-for sale financial assets

AFS financial assets are non-derivatives that are either designated as AFS or not classified in any of the other financial asset categories and are subsequently measured at fair value, determined by published market prices in an active market. Changes in the fair value of AFS financial assets are recognized as other comprehensive income and classified as a component of equity.

Management assesses the carrying value of AFS financial assets at every reporting year and any impairment charges are also recognized in income or loss. When financial assets classified as AFS are sold, the accumulated fair value adjustments recognized in other comprehensive income are included in net income (loss). The Company does not have any assets classified as AFS.

Loans and receivables financial assets

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are classified as current assets or non-current assets based on their maturity date. Loans and receivables are carried at amortized cost less any impairment.

MANAGEMENT DISCUSSION AND ANALYSIS

They are carried at amortized cost less any impairment. The impairment loss of receivables is based on a review of all outstanding amounts at year-end. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would not be material. Amounts receivable are included in this category of financial assets.

(ii) Financial liabilities

The Company classifies its financial liabilities in the following categories: borrowings and other financial liabilities, and financial liabilities at FVTPL.

Borrowings and other financial liabilities

Borrowings and other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred, and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in the statement of operations over the year to maturity using the effective interest method.

Borrowings and other financial liabilities are classified as current or non-current based on their maturity date. Financial liabilities include accounts payable.

Financial liabilities at FVTPL

Financial liabilities at FVTPL are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting date with changes in fair value recognized in operations. Transaction costs are recognized in operations as incurred. The Company does not have any liabilities classified as FVTPL.

Income taxes

Income tax expense represents current tax and deferred tax. The Company records current tax based on the taxable profits for the year, which is calculated using tax rates that have been enacted or substantively enacted by the reporting date.

Deferred income taxes are accounted for using the liability method. The liability method requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities and their tax bases. Deferred income tax assets and liabilities are determined for each temporary difference based on currently enacted or substantially enacted tax rates that are expected to be in effect when the underlying items of income or expense are expected to be realized. The effect of a change in tax rates or tax legislation is recognized in the year of substantive enactment. Deferred tax assets, such as non-capital loss carry-forwards, are recognized to the extent it is probable that taxable profit will be available against which the asset can be utilized.

Foreign currency translation

The functional and reporting currency of the Company is the Canadian dollar. Amounts recorded in foreign currency are translated into Canadian dollars as follows:

- (i) Monetary assets and liabilities, at the rate of exchange in effect as at the statement of financial position date;
- (ii) Non-monetary assets and liabilities, at the exchange rates prevailing at the time of the acquisition of the assets or assumption of the liabilities; and
- (iii) Revenue and expenses (excluding amortization, which is translated at the same rate as the related asset), at the rate of exchange on the date of the transaction.

MANAGEMENT DISCUSSION AND ANALYSIS

Critical accounting estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting year. Significant areas requiring the use of management estimates relate to determining the recoverability of exploration and evaluation assets and property and equipment, the determination of accrued liabilities, accrued site remediation, rates of amortization, the recoverability of amounts receivable, the variables used in the determination of the fair value of stock options granted and warrants issued, and the determination of the recoverability of deferred tax assets. While management believes the estimates are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

Provisions

Provisions are recognized where a legal or constructive obligation has been incurred as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation.

Segmented information

The Company's operations consist of a single operating segment and all operations are located in Canada.

Flow-through shares

The Company finances some exploration expenditures through the issuance of flow-through shares. The resource expenditure deductions for Canadian income tax purposes are renounced to investors in accordance with the appropriate income tax legislation. When the flow-through shares are issued, the difference ("flow-through share premium") between the amount recognized in common shares and the amount the investors pay for the shares is recognized as a flow-through share related liability which is reversed into the statement of comprehensive loss as other income when the eligible exploration expenditures are incurred.

CERTIFICATION OF INTERIM FILINGS

The President and Chief Executive Officer and Chief Financial Officer have signed the official basic certificates for venture issuers as required by *Regulation 52-109 respecting certification of disclosure in issuers' annual and interim filings*, confirming the review, absence of untrue or misleading information and fair presentation of the interim documents filed.

The President and Chief Executive Officer and Chief Financial Officer have confirmed that they have reviewed the interim financial statements and the interim MD&A (collectively referred to as the "interim filings") of the Company for the nine-month period ended October 31, 2013.

The President and Chief Executive Officer and Chief Financial Officer have confirmed that, based on their knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, with respect to the period covered by the interim filings

The President and Chief Executive Officer and Chief Financial Officer have confirmed that, based on their knowledge, having exercised reasonable diligence, the interim financial statements together with the other financial information included in the interim filings fairly present in all material respects the

MANAGEMENT DISCUSSION AND ANALYSIS

financial condition, results of operations and cash flows of the issuer, as of the date and for the periods presented in the interim filings for these periods.

OTHER REQUIREMENTS IN THE MANAGEMENT DISCUSSION AND ANALYSIS

The following selected financial information data is derived from the unaudited condensed interim financial statements at the periods indicated.

EXPLORATION AND EVALUATION ASSETS

	October 31 (9 months)	
	2013	2012
Balance, beginning of period	\$ 2,647,761	\$ 1,911,044
Add:		
Acquisition of exploration and evaluation assets	462,500	822,763
Drilling	85,569	-
Metallurgical test	8,782	-
Geology and geophysics	140,356	196,504
Analysis	4,262	104,163

November 2014	2,050,000	0.10
	11,640,292	

Risks and Uncertainties

Canada Strategic is subject to a variety of risks, some of which are described below. If any of the following risks occur, the Company's business, results of operations or financial condition could be adversely affected in a material manner.

Exploration and mining risks. The business of exploration for minerals and mining involves a high degree of risk. Few properties that are explored are ultimately developed into producing mines. Unusual or unexpected formations, formation pressures, fires, power outages, labour disruptions, flooding, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the conduct of exploration programs. The Company from time to time increases its internal exploration and operating expertise with due advice from consultants and others as required. The economics of developing gold and other mineral properties is affected by many factors, including the cost of operations, variation of the grade of ore mined and fluctuations in the price of any minerals produced. There are no underground or surface plants or equipment on the Company's mineral properties, nor any known bodies of commercial ore. Programs conducted on the Company's mineral property would be an exploratory search for ore.

Titles to property. While the Company has diligently investigated title to the various properties in which it has an interest, and to the best of its knowledge, title to those properties are in good standing, this should not be construed as a guarantee of title. The properties may be subject to prior

MANAGEMENT DISCUSSION AND ANALYSIS

unregistered agreements or transfer, or native or government land claims, and title may be affected by undetected defects.

Permits and licenses. The Company's operations may require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects.

Metal prices. Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect marketability of any minerals discovered. Metal prices have historically fluctuated widely and are affected by numerous factors beyond the Company's control, including international, economic and political trends, expectations for inflation, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities and worldwide production levels. The effect of these factors cannot accurately be predicted.

Competition. The mining industry is intensely competitive in all its phases. The Company competes with many companies possessing greater financial resources and technical facilities than itself for the acquisition of mineral interests as well as for recruitment and retention of qualified employees.

Environmental regulations. The Company's operations are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions of spills, release or emission of various substances produced in association with certain mining industry operations, such as seepage from tailing disposal areas, which could result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations require submissions to and approval of environmental impact assessments. Environmental legislation is evolving in a manner which means stricter standards, and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

Conflicts of interest. Certain directors or proposed directors of the Company are also directors, officers or shareholders of other companies that are similarly engaged in the business of acquiring, developing and exploiting natural resource properties. Such associations may give rise to conflicts of interest from time to time. The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest which they may have in any project or opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any director in a conflict will disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at that time.

Stage of development. The Company's properties are in the exploration stage, and to date none of them have a proven ore body. The Company does not have a history of earnings or providing a return on investment, and there is no assurance that it will produce revenue, operate profitably or provide a return on investment in the future.

Industry conditions. Mining and milling operations are subject to government regulations. Operations may be affected in varying degrees by government regulations such as restrictions on production, price controls, tax increases, expropriation of property, pollution controls or changes in conditions under which minerals may be mined, milled or marketed. The marketability of minerals may be affected by numerous factors beyond the control of the Company, such as government regulations. The effect of these factors cannot be accurately determined.

MANAGEMENT DISCUSSION AND ANALYSIS

Uninsured hazards. Hazards such as unusual geological conditions are involved in exploring for and developing mineral deposits. The Company may become subject to liability for pollution or other hazards which cannot be insured against or against which the Company may elect not to insure because of the high cost of premiums or for other reasons. The payment of any such liability could result in the loss of Company assets or the Company's insolvency.

Future financing. Completion of future programs may require additional financing, which may dilute the interests of existing shareholders.

Key employees. Management of the Company rests on a few key officers and members of the board of directors, the loss of any of whom could have a detrimental effect on its operations.

Canada Revenue Agency. No assurance can be made that Canada Revenue Agency will agree with the Company's characterization of expenditures as Canadian exploration expenses or Canadian development expenses or the eligibility of such expenses as Canadian exploration expenses under the *Income Tax Act* (Canada).
